Mirroring – Adding Password support – Adding Restoring ability
What's new in Flux2Fusion
RestoreSure? Version 1.0.0.0: – Adding Password support – Adding Restoring ability
Hello
community! It's finally here – we release Flux2Fusion RestoreSure 2.5! This major release
introduces a long awaited feature: server mirroring! Mirroring allows you to do a backup of an
entire server or a selected drive. Exporting a single server from Flux2Fusion RestoreSure is as
simple as clicking a button. You will just have to choose which server to export and click Export
on the Export tab. We have also made some minor improvements to the application's usability:
password protected folders are now supported, password folders can now be exported to a zip
archive as well as the application's Restore functionality has been improved. Flux2Fusion
RestoreSure is an easy and efficient solution for backup purposes. No need to rely on third-party
applications, that only provide basic image backups, for full system backups. With Flux2Fusion
RestoreSure, you can easily create backups for your entire file system and data, directly from
your desktop. Download and install Flux2Fusion RestoreSure, set up it, and start creating
backups right away. Do not forget to backup your data, after you have a system crash!
Flux2Fusion RestoreSure Description: What's new in Flux2Fusion RestoreSure? Version
