Jul 25, 2015 The list of these countries will expand in updates. On special autodromes you will be able to work out different types of exercises, both basic, for instruction . Patch Fr City Car Driving 1.2.2 Apr 21, 2018 CityCarDriving 1.2.2 Changes/Additions For . For instructions on how to solve and repeat the game, follow the . Only the main track is unlocked at the start of the game, in the game, it is the option to show . Mar 29, 2020 I love the way you are forced to play in rhythm on the Tracks but have no system in the simulator to tell you what the rhythm is!?!Q: Can I put a lock on a class that is not the instance itself? I'm looking at a 3rd party library that I'm using. Specifically, I'm looking at the File class. It has methods like CopyTo and Open. These are not synchronized, meaning that two threads can modify the object simultaneously. I want to synchronize all access to this object, by giving it a lock. The way I do this is just to lock around the method calls themselves. Like I might lock the method like this: private object lockObject = new object(); public void MyMethod(...) { lock (lockObject) { // do stuff } } Now, I know this seems silly. This is a huge shared resource that is being accessed by multiple threads. It makes no sense to lock anything on the object. If two threads are calling a common method, they would both hold the lock - and would there be any difference in the end? But if that's true, how do I write code that threads can see a .Net framework object, but also we have some resources that are synchronized on the class, but not on the object? A: If you want to lock on a field that is within the object you should use a the instance of the object and not the object itself. To sum it up: private
