I like that the name "Neurols" reminds me of other clever wordgames I've enjoyed like Warez. (e.g., "Package Makers" The deeper you read about the software industry, the more you notice how similar things like myself, Finalgon, and Engineer have in common. We're all smart programmers who like wordgames. An Engineer might be a little more technical - but really, most of us just want to play with words and make funny sounds and videos. I'm excited about Neurols. We've gotta take something from everyone else in the wordgame world. The Amiga brand of games like Mayhem, Space Rocker, Bongos, and many many more. Linux, Unix, web browsers, and games like Eye of Horror still need some colourful funny wordgame art, not to mention simple circles, squares, circles of lines, rows of circles, colors, colors of lines, boxes, round boxes, awesomeness - like a wordgame brain-map drawing tour-de-force display. Welcome to my Channel. I have spent a great deal of time creating this maze game, so I hope you enjoy it. The game is the same for each level. You have a stopwatch on the left side of the screen which counts your moves. The second hand at the bottom of the screen counts moves. The maze you are in is generated randomly. Once the generator has been done, you can't go back and replay. When you are done moving, the game is over. The number of moves you have done is displayed under the stopwatch. If you like the game, please consider subscribing to my Channel, being my Patron on Patreon FavouriteAnimations? This is a game where your life is extremely important. Your school mates can see you and hear you at any time. Your aim is to kill as many people as you can and escape from the school because no one can see or hear you and you can't be killed. You are a high school student who doesn't have any luck in school. It seems like all of your friends are constantly in trouble with the faculty. Your total effort is to avoid the teachers as much as you can. The faculty is the authority of school. You can kill your school mates by shooting them. They can die by hitting the ground or in the water. You can also throw them into the fire and they burn. When they run into the water they can drown. You can also block their way by throwing books at them and use guns in some places to create different ways to kill them. You can also move around t... published: 23 Sep 2015 Minecraft - #96: Minikrypt Drowning / Minikrypt Escape [Gameplay] Minecraft - MinikryptDrowning - Escape without Fudging :D ----------------------------------------- Llamas :D----------------------------------------- // Everything is mine, just a fan of the awesome minecraft mod:

: The Secret Alchemy Grimoire Groves: The Secret Alchemy is a strategy role-playing game developed by Coconut Island and published by Friesland Interactive in late 2017. The player takes on the role of "the Sage" and must raise an army to protect their castle against enemy advances. In single-player mode they must explore and find a series of objects to build an academy to unlock the secrets of the story. In "Story Mode" the goal is to defeat the enemy leader, Lucifer. The game also supports multiplayer games where up to eight players can join in one game. Development was funded through Patreon starting July 2016 and the game was finally released on Steam November 22, 2017. Gameplay Grimoire Groves: The Secret Alchemy is a strategy game featuring a 3D fantasy engine. The gameplay features single player story and multiplayer battles. Several characters will appear from a role-playing game throughout the story. The game also features randomized maps and are generated at the start of each match, as well as different terrain types. The game contains a Campaign Mode and a "Story Mode", although it lacks a specific end point. The game features four classes each with nine skills. Inspector The Inspector is responsible for gathering and distributing materials, and repairing injured warriors. Land Speeder The Land Speeder is the coolest class, as they can use firebombs, lightning, and solar power (shines light around the map). This class is focused on achieving the "Hero" honor level. An epic attack that kills your enemies with only one stone. Engineer The Engineer is the oldest class, as they are instigators of science and technology. Their spells are complex, and focus on "Swarms" and the "Venom". Prior to release the Engineer was a melee character that had no magic spells. This class was completely redesigned and now has spells similar to what engineers do in typical games. Cartographer The Cartographer is the mage class. They can cast using wood, smiths, and fire. Spells are strong in their effects, but these spells are extremely mana inefficient. Cartographers have no magic ability, but unlike the engineer, no melee attacks either. Admins The Admins are the members in the Garbadge Army who carry out management duties. They are also known as heroes. The Admins' special ability is

================ Spoiler: This game is a remake of the manga "THE MONSTER OF MEMORY: DESTINY" written by "Kenshō Fujimura," which was serialized in Houbunsha's Bessatsu Hana to Yume. The manga was recently adapted into a full-length anime by Aniplex+. The anime is currently airing on TV Tokyo. The story starts off with the protagonist, Sumi, and his teammate in the Soccer Club, Nao, are invited to the Roppongi zoo. However, after the invitation to the zoo, Sumi sees a bus accident that was caused by a RE614. The following scenes of the game are then set six years after the accident. The character of Sumi acts as a playable character, while Haru also joins as an optional character along with the rest of his teammates from the soccer club. The objective is to make the best decision in the current situation that Sumi encounters while searching for the answers to several questions. "The Monster of Memory: Destiny" has the following characteristics: - A visual novel with full-page illustrations and pictures, along with CGs from the original manga and 16 new scenes - Animated, voiced, and chibi versions of all of the characters, as well as a total of seven voice actresses - In addition to the manga being completely represented in the form of a visual novel, three new plots and memories have been added for players to enjoy. --- Game features --- - The vast majority of the game has been rewritten. Starting from the storyline, this has been a long process. - The main themes are "Love," "Trust," "Growth," and "Freedom." - The characters have been designed and the original power of the three human members (Sumi, Haru, and Nao) has been accurately expressed. - The illustrations and CGs are entirely new. 本作 是在 台湾 获得第 八届金 Winning the 8th Golden Manga Award in Taiwan, Visual novel "THE MONSTER OF MEMORY:DESTINY" has been adapted from the manga of the same name! ●featuring 16 full-colour CGs from the original manga to retain the original flavour, and a total of more
