Download Manual. In which the high-contrast characteristics of the borescope image.Q: How to get the ID and the product title of the matched product? I have 3 tables: products: +----+-----+ | id | name | +----+-----+ | 1 | apple | +----+-----+ menu: +----+-----+ | id | name | +----+-----+ | 1 | mainMenu | +----+-----+ products_menu: +----+-----+ | id | menu_id | +----+-----+ | 1 | 1 | +----+-----+ I would like to select all products, and display the product name and the product id. Example: Products: 1 apple Menu: 1 mainMenu Products_Menu: 1 1 I can get the product ID using the following: Product.find(params[:id]).id But how can I also get the product name? A: You can use pluck to get a list of the column names for any given association. Product.pluck(:id, :name) From the docs: Returns an array of all the columns from a table. By default it returns the id, created_at, updated_at columns. You can also include any associations in the query by adding the table name and an array of symbols indicating which associations should be returned: This will give you a set of columns of the form: ["id", "name",) A: If you want to get the products and menu together, you will need to rejoin the data. You can do this via pivot table, like this: join 'product_menu' on 'product_menu' .where('product_id =?', id) This will return a select for the results, and you can send the results to a template for rendering. If you want the option of using flash, you can do that too. This is an outline of what I mean. I'm not going to code it for you. Products id

aspects of water.. Bonding of
adhesives, or resins, used in
construction. Rating of the
quality of water used in a. Role
of Hsp70 in radiation
resistance and toxicity of
human oral cancer cells. This

study was undertaken to investigate the role of heat shock protein 70 (Hsp70) in radiation resistance and clonogenic survival of oral cancer cells. Hsp70 expression was estimated by RT-PCR and Western blotting. Inhibition of Hsp70 synthesis and function by chemical (dimethyloxallylglycine) and antisense (AS) nucleotides was carried out by transfection of either antisense (AS) or scrambled (Sc) oligonucleotide. Inhibition of Hsp70 expression

was confirmed by RT-PCR and Western blotting. Clonogenic survival of cells was analyzed by clonogenic assay. Hsp70 expression was detected in CAL27 cell line but not in SCC9 cell line. Following exposure of CAL27 cells to heat shock (HS) at 46 degrees C for 30 min, Hsp70 expression was found to increase in the cell line. On the other hand, increased expression of Hsp70 was detected in SCC9 cells following hypoxia (8% O₂) for 18 h. Increase in expression of

Hsp70 was accompanied by increase in survival fraction in both CAL27 and SCC9 cells.

These results indicate that Hsp70 may serve as a regulator of radiation resistance and toxicity of oral cancer

cells. Immunohistochemical evidence for a neuronal origin of neurohypophysial axons

Flathead railway engines have also been preserved at the railway museum. Borescope Inspection - Roadtrain.info The borescope inspection of the engines, in Police: Boy, 16, killed in Lawrence home JEFFERSON CITY, Mo. — A 16-year-old Kansas City boy was shot and killed during a home invasion and robbery near downtown Lawrence, authorities said Monday. The Jefferson County

Prosecutor's Office charged Renard Lamar Allen of Kansas City, Mo., with first-degree murder, armed criminal action and armed criminal conspiracy in the death of Loren Taylor. Allen was in custody Monday morning in Lawrence, about 30 miles south of Kansas City, after police got a tip about his involvement in the slaying of Taylor, a Lawrence resident, in his home on the city's west side about 1:45 a.m. Sunday, police said. The online Kansas City Star reported Allen was being held without bail in the Douglas County jail. Prosecutors would not comment on a possible bond. Authorities say Allen and a man identified as Junius Allen, 26, used a crow bar to force entry into the house. The men then took a woman into the bathroom to sexually assault her. Allen is being held in Douglas County on a traffic warrant related to a conviction on a drug charge, said Lawrence Police Capt. James Sechrist, a spokesman for the Douglas County Sheriff's Department. Investigators said Taylor was found on the floor, struck in the head by a crowbar, and that blood was found on a wall, and on the bathroom floor. According to arrest documents, Allen and Taylor both knew each other. Bond had been set at \$5 million or \$1 million on a murder charge, but Superior Court Judge Greg Miller reduced it to \$500,000 or \$200,000 after Allen's mother posted \$20,000 in cash and the family's house and four cars were seized as potential collateral. The mother was not present in court and would not comment on the case. Allen remains in custody at the Douglas County Jail on a traffic warrant. The other suspect and the woman who was taken into the bathroom remain at-large, said Lawrence Police Chief Douglas Larmour. Authorities did not know how many people were in the house. Last month, the Associated Press reported the Kansas City Star found a murder charge had been filed in a 2002 killing in Lawrence after the man who was initially arrested in that case turned
