HISTORY Look here to find out about this project's past, notable people and available versions and add-on patches. (Last modification of the original document was 2015-03-17.) Version 2.51: Donations to the HEX and the GPG key site are useful for both users and developers. If you run into any problems, they might be able to help you. For example, if you have a question about HEX, ask it on the Internet Relay Chat (IRC), see these instructions. Or if you are an HEX developer, you can ask on developer@hex.wizards.com. Version 2.50: If you have any problem with HEX, please ask on IRC. I'm talking about the IRC channel #hex-wizards on Freenode. Version 2.49: If you see any errors in the GPG, such as "ERROR: Could not read from key" in the mail.hex.wizards.com key archive, please let me know. Version 2.48: When users send me patches, they are sometimes reported as "invalid", so I fixed that. Version 2.47: If you are having problems with the HEX Hex Store, I've added a partial text file as resources/hexstore.lst for you. I'm going to continue to add more items to that list. Version 2.46: HEX will now warn you if you try to download a file that is larger than 2GB (but it won't stop you from downloading it). Version 2.45: When I first wrote HEX, the user interface was only available as a demo; now it is available as a beta. The beta is easier to use than the demo, and it fixes some bugs. Version 2.44: I added support for both the "unstable", "all files", and "draft" draft.hex.wizards.com key archives. Version 2.42: If you are having problems with the HEX Hex

Store, please let me know. Version 2.41: The GPG key site has updated its capabilities, and is now a fully-
