So far I have not received your document, but I will send you the · Banyaland Cm93 Ed 2 Charts 2013 - A737-400 - O.1. Field of the Invention The present invention relates to a capacitive load driving circuit for driving a capacitive load, and more particularly, to a capacitive load driving circuit that controls an output voltage value of a power supply source based on a value of a capacitive load in a system in which the capacitive load is driven using a power supply source and a temperature of the capacitive load is detected by using a thermistor. 2. Description of the Related Art A touch screen panel of a display device can detect whether an object such as a stylus pen, a finger, or the like touches the touch screen panel to thereby be inputted through the display device. Such a touch screen panel is used for an input unit such as a display device of a portable terminal, a TV remote controller, a wireless POS system, and the like. Therefore, research into the touch screen panel is being actively conducted. The touch screen panel is classified into a resistive type, a capacitive type, and an optical type, according to a touch detection method. A resistive touch screen panel and a capac 6d1f23a050
